

Buyers Agent Timeline

It's important to note that the timings of this journey are completely different for each investor. Some have pre-approval, know what they want and are keen to be in the market as soon as possible.

In this scenario, dependant on appropriate properties and feasibility, a property could be purchased within a few days of the client signing an agreement to invest in a HMO. Alternatively, if an investor wants to compare a few properties before getting started, this process will take a little longer.

It's entirely up to you!
